

1. Create [Github](#) account

The screenshot shows the GitHub homepage with a sign-up form on the right. The form has fields for Username, Email, and Password. Below the Password field is a note: "Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter. [Learn more.](#)" A green "Sign up for GitHub" button is at the bottom of the form. At the very bottom of the page, there is a small line of text: "By clicking 'Sign up for GitHub', you agree to our [Terms of Service](#) and

Sign up for GitHub

By clicking "Sign up for GitHub", you agree to our [Terms of Service](#) and

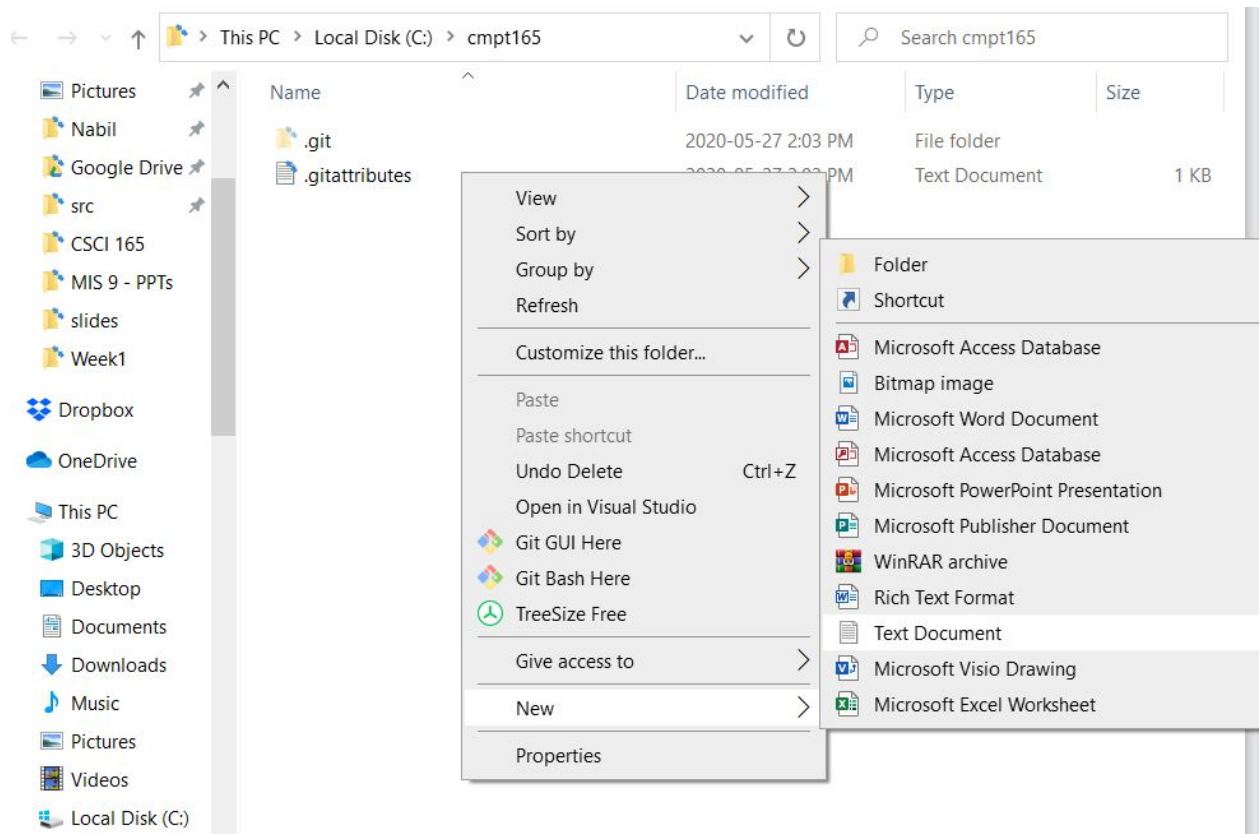

2. Download <https://desktop.github.com/>

3. Create a *repo* with the same *csci165*

4. Create *index.html* inside the home directory of your repo

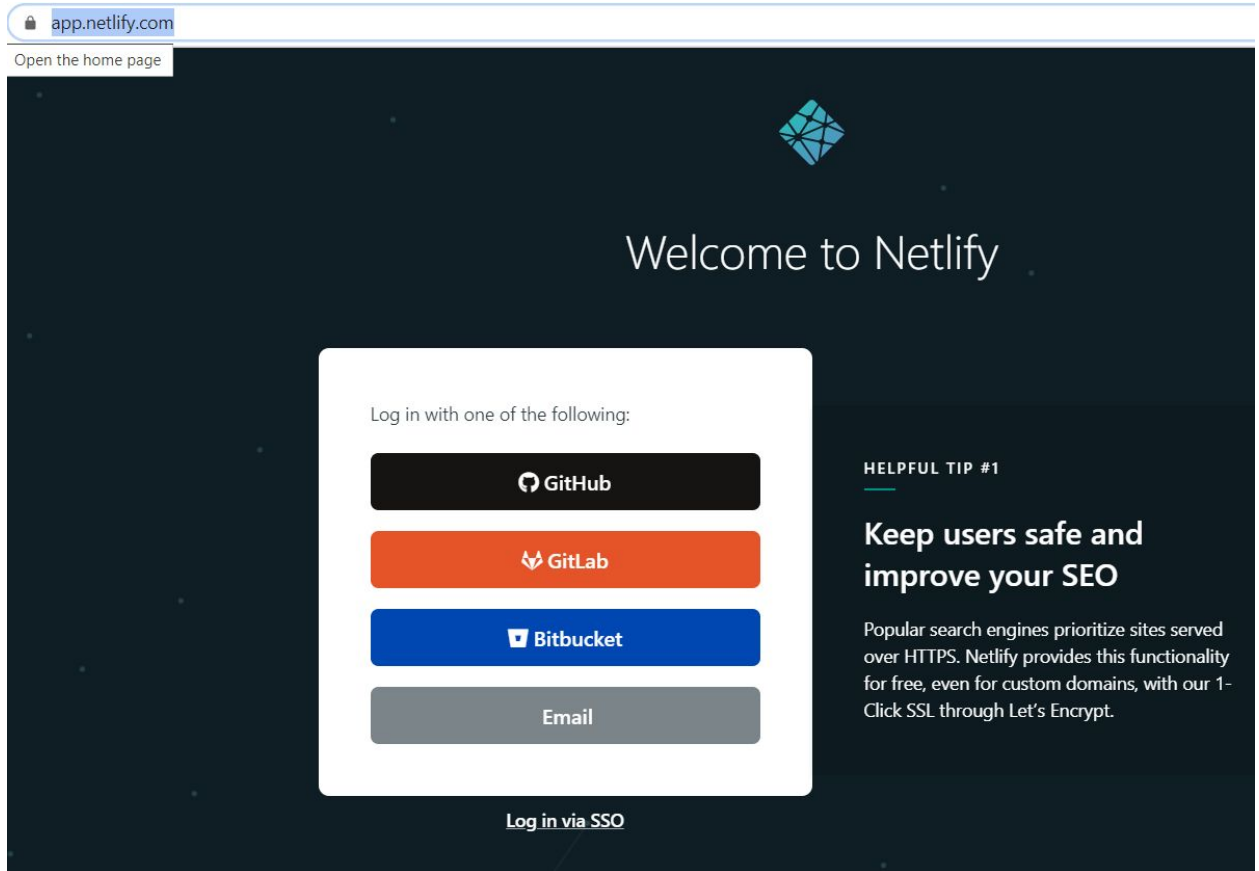

5. Open *index.html* and fill with this content

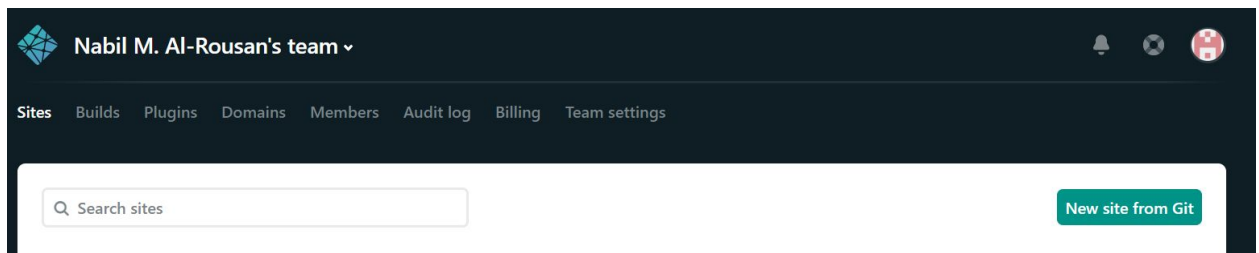

```
<html>
<head>
  <title>Home</title>
</head>
<body>
  Hi, my name is yourname .
</body>
</html>
```

6. Save the file.
7. Commit and Push
8. Review your changes on Github.com

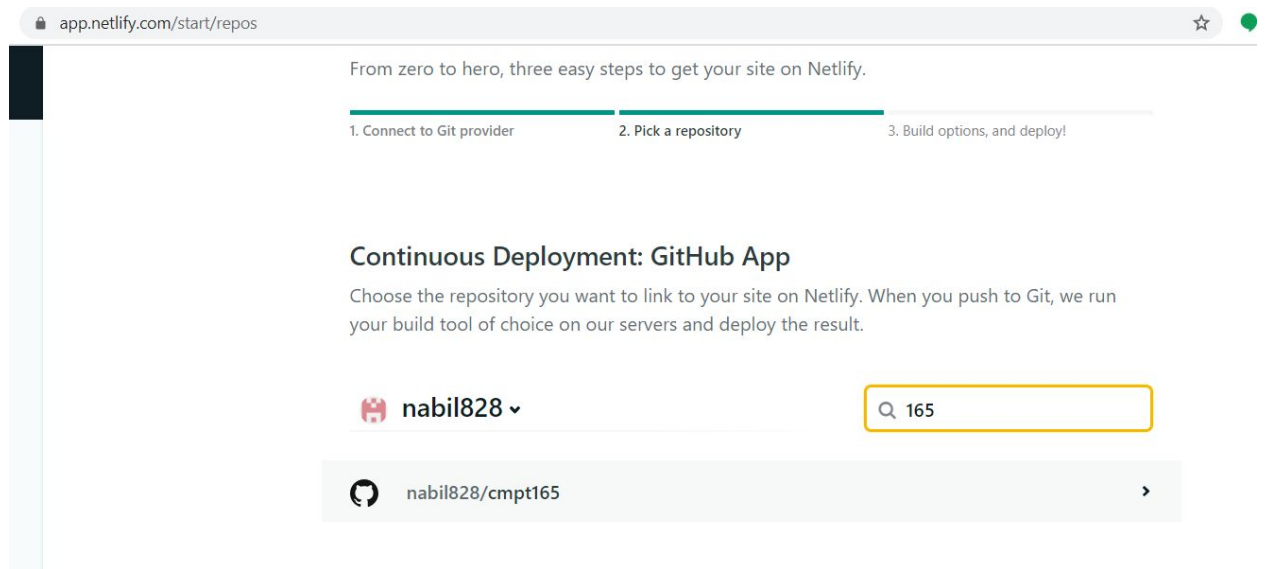

9. Create <https://app.netlify.com/> account and link it to your Github account

10. Create a new site in Netlify

11. Link Netlify site to Github repo

The screenshot shows the Netlify 'start/repos' page. At the top, a progress bar indicates three steps: '1. Connect to Git provider', '2. Pick a repository' (which is the current step), and '3. Build options, and deploy!'. Below the progress bar, the heading 'Continuous Deployment: GitHub App' is followed by a paragraph explaining that users can link their repository to Netlify for automatic builds and deployments. A search bar with the text 'nabil828' and a dropdown arrow is shown, with a search result for 'nabil828/cmpt165' displayed below it. The URL in the browser's address bar is 'app.netlify.com/start/repos'.

From zero to hero, three easy steps to get your site on Netlify.

1. Connect to Git provider 2. Pick a repository 3. Build options, and deploy!

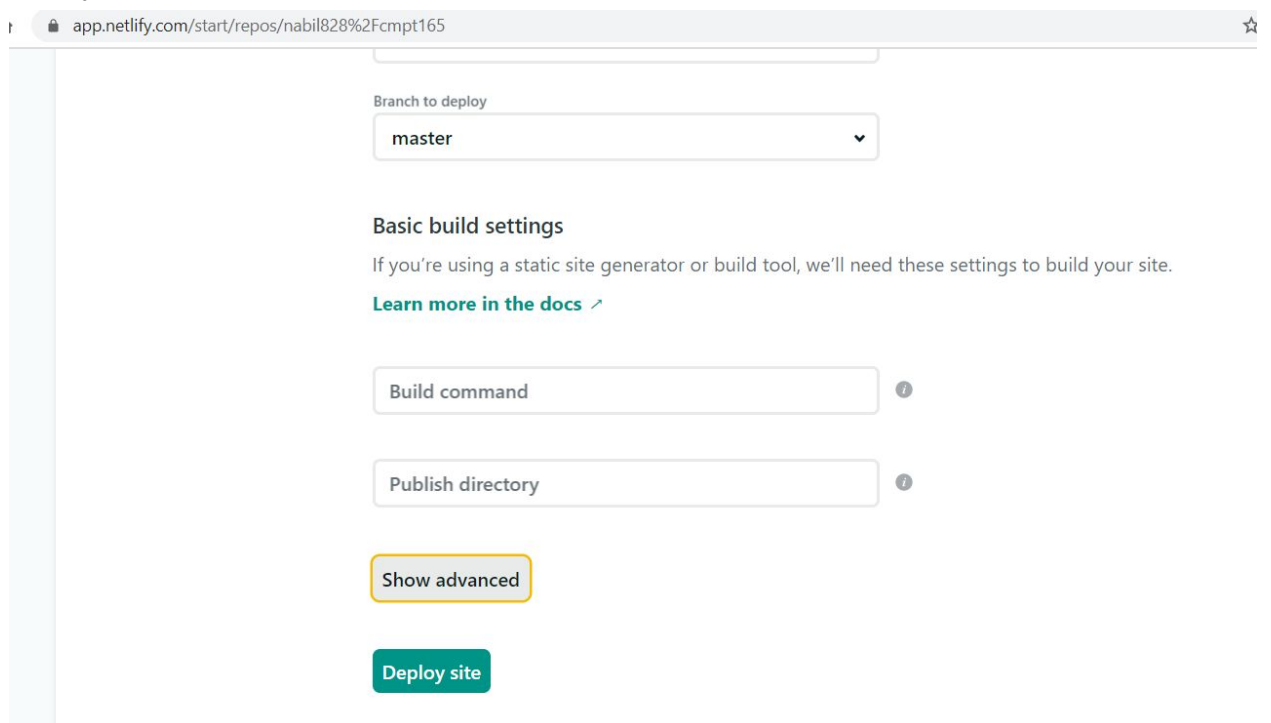

Continuous Deployment: GitHub App

Choose the repository you want to link to your site on Netlify. When you push to Git, we run your build tool of choice on our servers and deploy the result.

nabil828/cmpt165 >

12. Deploy!

The screenshot shows the Netlify 'start/repos/nabil828%2Fcmpt165' page. The 'Branch to deploy' dropdown menu is set to 'master'. Below this, the 'Basic build settings' section explains that static site generators or build tools require specific settings. There are input fields for 'Build command' and 'Publish directory', each with an information icon. A 'Show advanced' button is highlighted with a yellow border. At the bottom, a green 'Deploy site' button is visible. The URL in the browser's address bar is 'app.netlify.com/start/repos/nabil828%2Fcmpt165'.
