

Today we will be making a Gallery of images using HTML!

1. Create the gallery with the following structure.

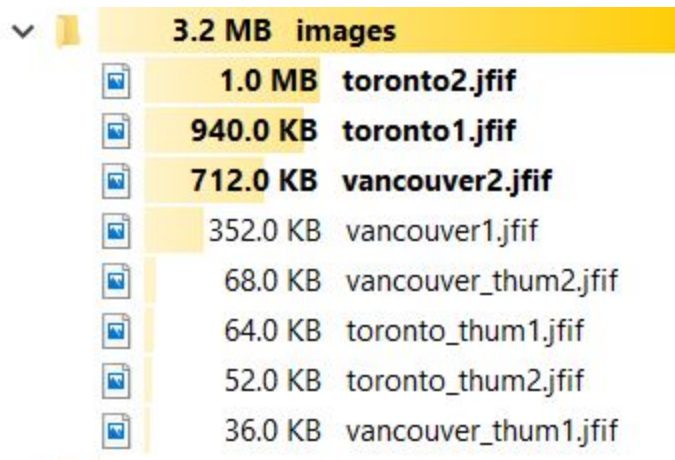

2. You can get the images from

<https://unsplash.com/s/photos/toronto>

And

<https://unsplash.com/s/photos/vancouver>

Notice that the size of thumbnails are typically smaller than the original images to have a faster loading page.

3. Create a simple lab4.html page that look like

- 
- [Vancouver](#)
  - [Toronto](#)
- 

4. For HTML page, add a simple description of the city (may be from Wikipedia) and add a simple Gallery.

Vancouver, a bustling west coast seaport in British Columbia, is among Canada's densest, most ethnically diverse cities. A popular filming location, it's surrounded by mountains, and also has thriving art, theatre and music scenes. Vancouver Art Gallery is known for its works by regional artists, while the Museum of Anthropology houses preeminent First Nations collections.

---

[Go Back!](#)

Please refer to the syntax of HTML [a](#) and [img](#) tags if needed.

5. Voila! I should be able to see pictures of Vancouver & Toronto

Notice that the image opens in a new window! Check the documentation an s usage of target attribute.
