1. Go to Random Recipe Generator
2. Write the html code for the generate recipe

Random Recipe Generator

Below is a randomly-generated recipe!

Spicy Sweetcorn Cakes

You will need:

- 3 leeks
- 5 green peppers
- 2oz of sweetcorn
- 2 pears
- 390g of liver

Instructions:

1. Score the leeks
2. Wash the green peppers
3. Weigh the sweetcorn
4. Wash the pears
5. Cut the liver into ribbons
6. Put the liver in the saucepan
7. Soak the sweetcorn
8. Roll out the pears
9. Slice the liver
10. Score the green peppers

3. For example, for the previous recipe, this the correspondent html code:

```
<h1 class="h2">Random Recipe Generator</h1>
    <p>Below is a randomly-generated recipe!</p>
        <h2>Spicy Sweetcorn Cakes</h2>
        You will need:
```

```html
<ul class="recipe_needs">
    <li>3 leeks</li>
    <li>5 green peppers</li>
    <li>2oz of sweetcorn</li>
    <li>2 pears</li>
    <li>390g of liver</li>
</ul>
Instructions:
<ol class="recipe_instr">
    <li>Score the leeks</li>
    <li>Wash the green peppers</li>
    <li>Weigh the sweetcorn</li>
    <li>Wash the pears</li>
    <li>Cut the liver into ribbons</li>
    <li>Put the liver in the saucepan</li>
    <li>Soak the sweetcorn</li>
    <li>Roll out the pears</li>
    <li>Slice the liver</li>
    <li>Score the green peppers</li>
</ol>
```
